# WHEAT, FEED GRAIN AND SOYBEAN STOCKS LARGER

Wheat stocks were 15 percent more than a year earlier, but otherwise the smallest January 1 holdings since 1953, according to the Crop Reporting Board. Stocks of the four feed grains totaled 156 million tons -- 9 percent more than last year, but 5 percent below average. Soybean stocks were a record high, 8 percent above a year earlier. Despite the increase in all wheat stocks, durum wheat holdings were 6 percent less than a year earlier. Rye stocks were down 2 percent from January 1, 1967, and holdings of flaxseed were 16 percent less.

All wheat in storage on January 1 totaled 1,208 million bushels, 15 percent more than last year but otherwise the smallest January 1 holdings since 1953. Off-farm stocks, at 704 million bushels, were up 10 percent from January 1 last year and farm holdings, at 505 million bushels, were up 23 percent. Disappearance from all storage positions during the 1967 October-December quarter is indicated at 348 million bushels compared with 387 million bushels a year earlier.

Durum wheat stocks in all positions on January 1 totaled 60.2 million bushels, 6 percent below a year earlier, and the smallest for the date since estimates began in 1962. Farm holdings of 46.4 million bushels were up 17 percent from a year earlier, but off-farm stocks at 13.8 million bushels, were down 47 percent. Disappearance during the 1967 October-December quarter is indicated at 14.5 million bushels compared with 31.6 million bushels a year earlier.

Rye stocks of 27.7 million bushels in all storage positions were 2 percent less than a year earlier. Farm stocks totaled 8.7 million bushels, 9 percent below last year. Off-farm holdings of 19.1 million bushels were 1 percent larger than a year earlier. The 1967 October-December disappearance is indicated at 5.5 million bushels compared with 9.3 million bushels a year earlier.

Corn in all storage positions on January 1 totaled 4,215 million bushels -- 15 percent more than a year earlier and 1 percent above average. Production of corn in 1967 was 15 percent more than in 1966, but carryover of old corn on October 1 was 2 percent less than a year earlier. Indicated disappearance of corn during the 1967 October-December quarter was 1,330 million bushels.

Washington, D. C.

SERVICE OPERATIONS  
DIVISION  
NOV 10 1968

Corn stored on farms totaled 3,353 million bushels, 16 percent more than on January 1 last year. Off-farm stocks of 862 million bushels were 11 percent above a year earlier.

Oat stocks in all storage positions on January 1 totaled 647 million bushels compared with 662 million a year earlier. Most of the decline in total stocks occurred in stocks held on farms. Oats held in farm storages totaled 544 million bushels, accounting for 84 percent of all stocks. Disappearance during the 1967 October-December quarter of 129 million bushels compared with 172 million bushels a year earlier.

Barley stored in all positions on January 1, 1968 totaled 303 million bushels -- 3 percent more than a year earlier. Both on-farm and off-farm stocks increased from year-earlier levels. Stocks located on farms totaled 183 million bushels, some 60 percent of stocks in all positions. Disappearance during the 1967 October-December quarter of 77 million bushels compared with 94 million bushels a year earlier.

Sorghum grain in all storage positions totaled 733 million bushels on January 1, 1968, 11 percent less than a year earlier. Production hit a record high in 1967, but carryover on October 1 was well below a year earlier. Off-farm stocks of 515 million bushels were down sharply from January 1, 1967. Stocks on farms, at 219 million bushels, were 7 percent less than a year earlier. Disappearance during the 1967 October-December quarter totaled 276 million bushels.

Soybean stocks in all positions on January 1, 1968 totaled 782 million bushels. This record high total was 8 percent above the 721 million bushels a year earlier. Off-farm stocks, at 432 million bushels, were 15 percent above a year earlier, and farm stocks at 350 million bushels were 2 percent above.

Stocks on January 1, 1968 indicate a disappearance during the 1967 September-December period of 281 million bushels from a beginning supply of 1,063 million bushels (carryover of 90 million bushels plus 1967 production of 973 million bushels). Reported disappearance for the September-December period included 189 million bushels processed for oil and approximately 110 million bushels exported.

Flaxseed stocks in all storage positions on January 1 totaled 18.2 million bushels -- 16 percent less than a year earlier and 27 percent below average. Farm stocks were 10 percent below January 1, 1967 and off-farm stocks were down 20 percent. Current stocks indicate a disappearance during the last half of 1967 of 10.9 million bushels from a supply of 29.2 million bushels (carryover of 9.3 million bushels plus 1967 production of 19.9 million bushels). Reported disappearance for the half-year included 8.4 million bushels crushed and 3.2 million bushels exported.

1/ Off-farm total plus farm stocks. October 1966 through October 1967 revised.

# Off-Farm Grain Storage Capacity

Capacity of off-farm commercial storage establishments in the United States was 5,446 million bushels on January 1, 1968. This is a net decrease of 50 million bushels from a year earlier because capacity of storages dismantled or dropped from use exceeded the capacity of new storage facilities.

Off-farm capacity for storage increased in 1967 in eastern and northern parts of the Corn Belt, most South Atlantic and South Central States and in a number of Western States. Significant declines were reported in Kansas, Texas, Oklahoma, and Nebraska and in the North Atlantic region. Texas and Kansas continue to rank first and second in off-farm storage with the two State total comprising about 30 percent of the Nation's total.

The capacity data, by States, prepared and issued in January each year, include all elevators, warehouses, terminals, merchant mills, ships under private control, other storages and oilseed crushers which store grain, flaxseed or soybeans. Capacity data exclude CCC bins, warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or dry peas.

## Capacity of Off-Farm Grain Storage Facilities, by States, January 1, 1967 and 1968
